

Nurse Residency Program

Nurse Residency Program Objectives

- * To expand your knowledge and critical thinking skills when caring for patients at the bedside
- * To improve your competence, confidence, and efficiency in providing evidence based best practice care
- * To facilitate an environment for you that is conducive to learning through instruction, policy review, critical thinking, and simulation

What you can expect from the Nurse Residency Program

This 9 month program provides you with the knowledge, skills, and resources to be successful at Morris Hospital. In addition to a 12 week orientation working directly with a trained preceptor, this program is designed to build your confidence as you learn to navigate how to care for patients on the Medical-Surgical and Intensive Care units.
